

YULIIA LEVYTSKA

FULLSTACK DEVELOPER

130 Walpole road, CB1 3UE Cambridge, UK | yulialevytska2@gmail.com |
www.linkedin.com

SUMMARY

FullStack Developer dedicated to building functional and visually appealing web applications with a strong focus on user experience. Proficient in HTML, CSS, JavaScript, React, Vite, Node.js, databases, and deployment via Vercel and GitHub. Skilled in full-cycle development — from concept to deployment — with a collaborative and solution-oriented mindset.

SKILLS

HTML5/CSS3	Trello	Vite	Node.js
JavaScript	GIT/GitHub	React	Vercel

KEY ACHIEVEMENTS

- **Built and deployed** a full-stack feedback app using React and Node.js
- **Enhanced user experience** with form validation and local storage integration
- **Optimized front-end** performance with Vite and React components
- **Contributed** to team-based projects using GitHub and Agile workflows

PROJECT EXPERIENCE

- **Dream Team GitHub Final Project – JavaScript Module, IT School GoIT**
Role: Frontend Developer
Section: Projects
Final team project at the end of the JavaScript module.
Developed the "Projects" section using semantic HTML, SCSS, and JavaScript
Implemented responsive design with attention to accessibility and UX
Collaborated in a team using GitHub, following Agile/Scrum practices
Participated in daily stand-ups, task planning, and code reviews
- **Watchcharm GitHub Final Project – HTML + CSS module, IT School GoIT**
Role: Frontend Developer
Section: Reviews
Created the "Reviews" section using semantic HTML and SCSS
Implemented responsive layout following mobile-first approach
Focused on clean, accessible markup and reusable styles
Worked in a Git-based team environment with regular sync-ups

• **Chocolate GitHub Solo Project – HTML + CSS**

Role: Frontend Developer

Developed a multi-section landing page for a fictional chocolate brand
Used semantic HTML and SCSS with mobile-first responsive layout
Implemented consistent design system and interactive elements (buttons, hover effects)
Focused on clean code, visual balance, and accessibility

• **Evoplay GitHub Command Project – HTML + SCSS + JS**

Role: Frontend Developer

Developed a single-page application as part of a team project using Vite and JavaScript
Built responsive layout with SCSS and semantic HTML following mobile-first principles
Configured project structure, code formatting tools, and optimized for deployment
Focused on clean, maintainable code and collaborative development via GitHub
